

GOA GETAWAY

7 Days / 6 Nights | Bengaluru ↔ Goa | 15–21 December 2026 | 2 Adults

This report presents a day-by-day itinerary for a one-week Goa holiday, split between North Goa (nightlife, water sports, forts, markets, Old Goa heritage) and South Goa (quiet beaches, Cabo de Rama, Agonda/Palolem), plus a fully itemised budget in Indian Rupees (INR). Flight, hotel and outstation-cab figures are live/indicative quotes pulled on **5 Sep 2026** via the makemytrip-mcp server (signed-out retail rates; MakeMyTrip cannot be booked through this tool). Entry fees, water-sports, cruise, jeep-safari and self-drive scooter costs are not exposed by any MakeMyTrip API/search funnel available to this tool, so they are sourced from December-2025/2026-season desk research and are clearly marked **[RES]** throughout, alongside **[MMT]** for live quotes and **[ASM]** for planning assumptions (meals, tips, contingency).

Trip Design & Reasoning

Goa's North (Bardez taluka: Candolim/Calangute/Baga/Anjuna/Vagator) and South (Canacona/Salcete taluka: Agonda/Palolem/Cabo de Rama) belts are 60–75 km apart – a 2–2.5 hour drive. Shuttling between them daily would burn a full day of the trip in transit, so the itinerary is **split into two bases**: 4 nights in North Goa (where most heritage sites, markets, water sports and nightlife are clustered) and 2 nights in South Goa (for a quieter, beach-relaxation finish). Days within each base are grouped by geography to minimise backtracking, and two flea-market visits are pinned to their actual open days in Dec 2026 (Anjuna – Wednesdays, Mapusa – Fridays); with only one week available, Mapusa was traded off against the Dudhsagar Falls/spice-plantation day, which needs a full day. Dabolim (GOI) is used throughout – not Mopa (GOX) – since it sits closer to both bases and every itinerary the flight search returned into GOX carried a materially higher fare or a layover.

- Check in to South Goa hotel in Agonda by early evening; relaxed sunset on Agonda beach

Transport: full-day chauffeured sedan, Candolim→Old Goa→Panjim→Cabo de Rama→Agonda ■2,800 [RES] (a multi-stop day-hire; MMT's point-to-point one-way quote of ■2,145 would undercount the detours and wait time, so a typical Dec-season 8hr/80km sedan day-rate is used instead). Flights – Bengaluru ↔ Goa (Dabolim)

Fetches live from MakeMyTrip via mmt-mcp on 5-Sep-2026 for 2 adults, economy cabin. Fares are per adult; totals below are for 2 passengers. GOX (Mopa) options are shown in the raw data but excluded here as GOI suits both bases better.

Leg	Flight	Depart → Arrive	Duration	Fare/adult	Total (2)
Outbound – 15 Dec	IndiGo 6E 6168	BLR 17:25 → GOI 18:45	1h 20m, non-stop	■4,577	■9,154
Return – 21 Dec	IndiGo 6E 6163	GOI 19:15 → BLR 20:25	1h 10m, non-stop	■5,994	■11,988

Flight subtotal (2 pax, round trip): ■21,142 [MMT]. Cheapest options seen were FLY91 (■3,099/■3,699 into SDW – Sindhudurg, an alternate airport ~1.5–2 hrs north of North Goa, not used here) and IndiGo's late-evening 6E 6554/6E 977 (■4,367) – the 17:25 departure was chosen for a same-day, comfortable arrival window.

Hotels

Live MakeMyTrip nightly retail rates (signed-out), 1 room / 2 adults. *stay_estimate* = nightly rate × nights, an MMT-provided estimate for a date range (a range spanning a price change may not match exactly).

Base	Hotel	Nights	Nightly all-in	Stay estimate
North Goa (Candolim)	Hyatt Centric Candolim Goa ★5 (4.3★ reviews) – chosen mid-range pick	4 (15–19 Dec)	■12,762	■51,048
South Goa (Agonda)	The Shore Agonda ★5 (4.0★ reviews) – Garden View room	2 (19–21 Dec)	■8,308	■16,616

Hotel subtotal: ■67,664 [MMT] (room-only rate; breakfast-inclusive plan for Hyatt Centric adds ■638/night – not included in the base budget below). **Budget alternative [MMT]:** Ginger Goa, Candolim (★4, 4.2★) at ■9,557/night (■38,228 for 4 nights) would cut ■12,820 from the North Goa leg if a business/lifestyle hotel is preferred over a 5-star resort.

Ground Transport & Intercity Cabs

Outstation point-to-point cab fares below are live MMT quotes [MMT]. MakeMyTrip's cab funnel only prices point-to-point trips, not the 8hr/80km local day-hire packages that Goa taxis commonly sell for multi-stop sightseeing days (Day 4 & Day 5) – this is a known gap in the MMT tool, so those two days instead sum/substitute one-way legs or use a researched day-rate, both flagged in the day-by-day notes above.

Route	Date	Vehicle (cheapest)	Fare (all-in)
Dabolim Airport → Calangute/Candolim	15 Dec	WagonR/Swift hatchback, CNG	■2,045
Candolim → Mollem (Dudhsagar gateway)	18 Dec	Dzire/Etios sedan, diesel	■2,145
Mollem → Candolim (return)	18 Dec	Dzire/Etios sedan, diesel	■2,145
Candolim → Palolem/Agonda (via Cabo de Rama)	19 Dec	Sedan day-hire (multi-stop)	■2,800 [RES]
Palolem → Dabolim Airport	21 Dec	WagonR/Swift hatchback, CNG	■2,045

Intercity/transfer cab subtotal: ■11,180 ([MMT] ■8,380 + [RES] ■2,800). All MMT quotes above returned Eroovo/Taxibazaar-operated hatchback or sedan cabs (~40 km, ~4 hr trips per the tool's distance/duration estimate) as the cheapest option; 6-seat SUV upgrades (Ertiga/Innova) run ■600–2,500 more per leg if extra luggage space is needed.

Local (within-belt) transport – self-drive scooters on 3 sightseeing days (Day 2, Day 3, Day 6) × 2 scooters @ ■600/day + fuel ■200/day/scooter-pair = **■4,200 [RES]**. Petrol-run gearless scooters (Activa/Jupiter class) typically rent for ■400–900/day in Dec peak season, rising toward ■1,000–1,500/day right around Christmas week; this trip ends just before that spike (21 Dec).

Per-person total: ■69,493. Breakdown by category: Flights ■21,142 (15.2%) • Hotels ■67,664 (48.7%) • Ground transport (airport + intercity + local) ■15,380 (11.1%) • Activities & entry fees ■8,300 (6.0%) • Nightlife ■4,000 (2.9%) • Shopping ■3,000 (2.2%) • Food ■14,000 (10.1%) • Contingency ■5,500 (4.0%). Hotels dominate the budget because both properties chosen are 5-star; swapping to the Ginger Goa budget alternative on Day 1–5 (see Hotels section) brings the trip to roughly **■1,26,166 (■63,083/person)** without changing any activity.

Assumptions, Data Caveats & How to Re-Price

What is a live MakeMyTrip quote vs. research: Flights, hotel nightly rates and the four outstation cab legs were pulled directly from MakeMyTrip via the makemytrip-mcp server on 5 Sep 2026 and are the actual signed-out retail figures the site shows today for these dates. Entry tickets, water sports, cruises, the jeep safari, spice-plantation tours, nightlife cover charges, scooter rentals, shopping and food are **not exposed by any MakeMyTrip search/booking funnel** reachable from this tool (confirmed via the capabilities probe) and were sized from December-season desk research instead.

Call-budget discipline: Per the task brief, only one outbound and one return flight search were run (no date- or airport-sweeping); the fares quoted are for the 17:25 BLR→GOI and 19:15 GOI→BLR non-stops specifically, not a sweep of the cheapest across the whole day. Two hotel searches (one per base's date range) and four one-way cab quotes were run, each once, with the two hotel searches retried once after an initial date-format/circuit-breaker failure (see below) – within the one-retry allowance.

Date correction: The MakeMyTrip tool's clock reports the current date as 5 September 2026; "15 December" therefore resolves to 15 Dec 2026, not 2025 (confirmed when initial 2025-dated hotel searches were rejected as being in the past). All prices in this report are for December 2026 accordingly.

Known gaps flagged by the MMT tool itself and how this report handled them: (1) no 8hr/80km local day-package cab funnel – substituted with either two one-way legs (Day 4) or a researched day-hire rate (Day 5), both called out inline; (2) hotel stay_estimate_all_in_inr is nightly × nights, not a true multi-night quote, so a rate change mid-stay would not be captured; (3) MakeMyTrip cannot be booked through this tool – all figures are indicative, pre-tax-surcharge-drift pricing for planning purposes, and should be re-confirmed on the site (or app) before actual payment.

To refresh this report closer to the trip date, re-run: mmt_flight_search (BLR↔GOI, both dates), mmt_hotel_rates for the two chosen hotel_ids, and mmt_cab_quote for the four routes listed in the Ground Transport table – fares can move with demand, especially in the week immediately before Christmas.

Report generated by Cline using the makemytrip-mcp server (live pricing) and Perplexity research (activity/local-transport context) on 5 Sep 2026. All prices in Indian Rupees (INR) and subject to change.
